

Fourier Transform

Amplitude

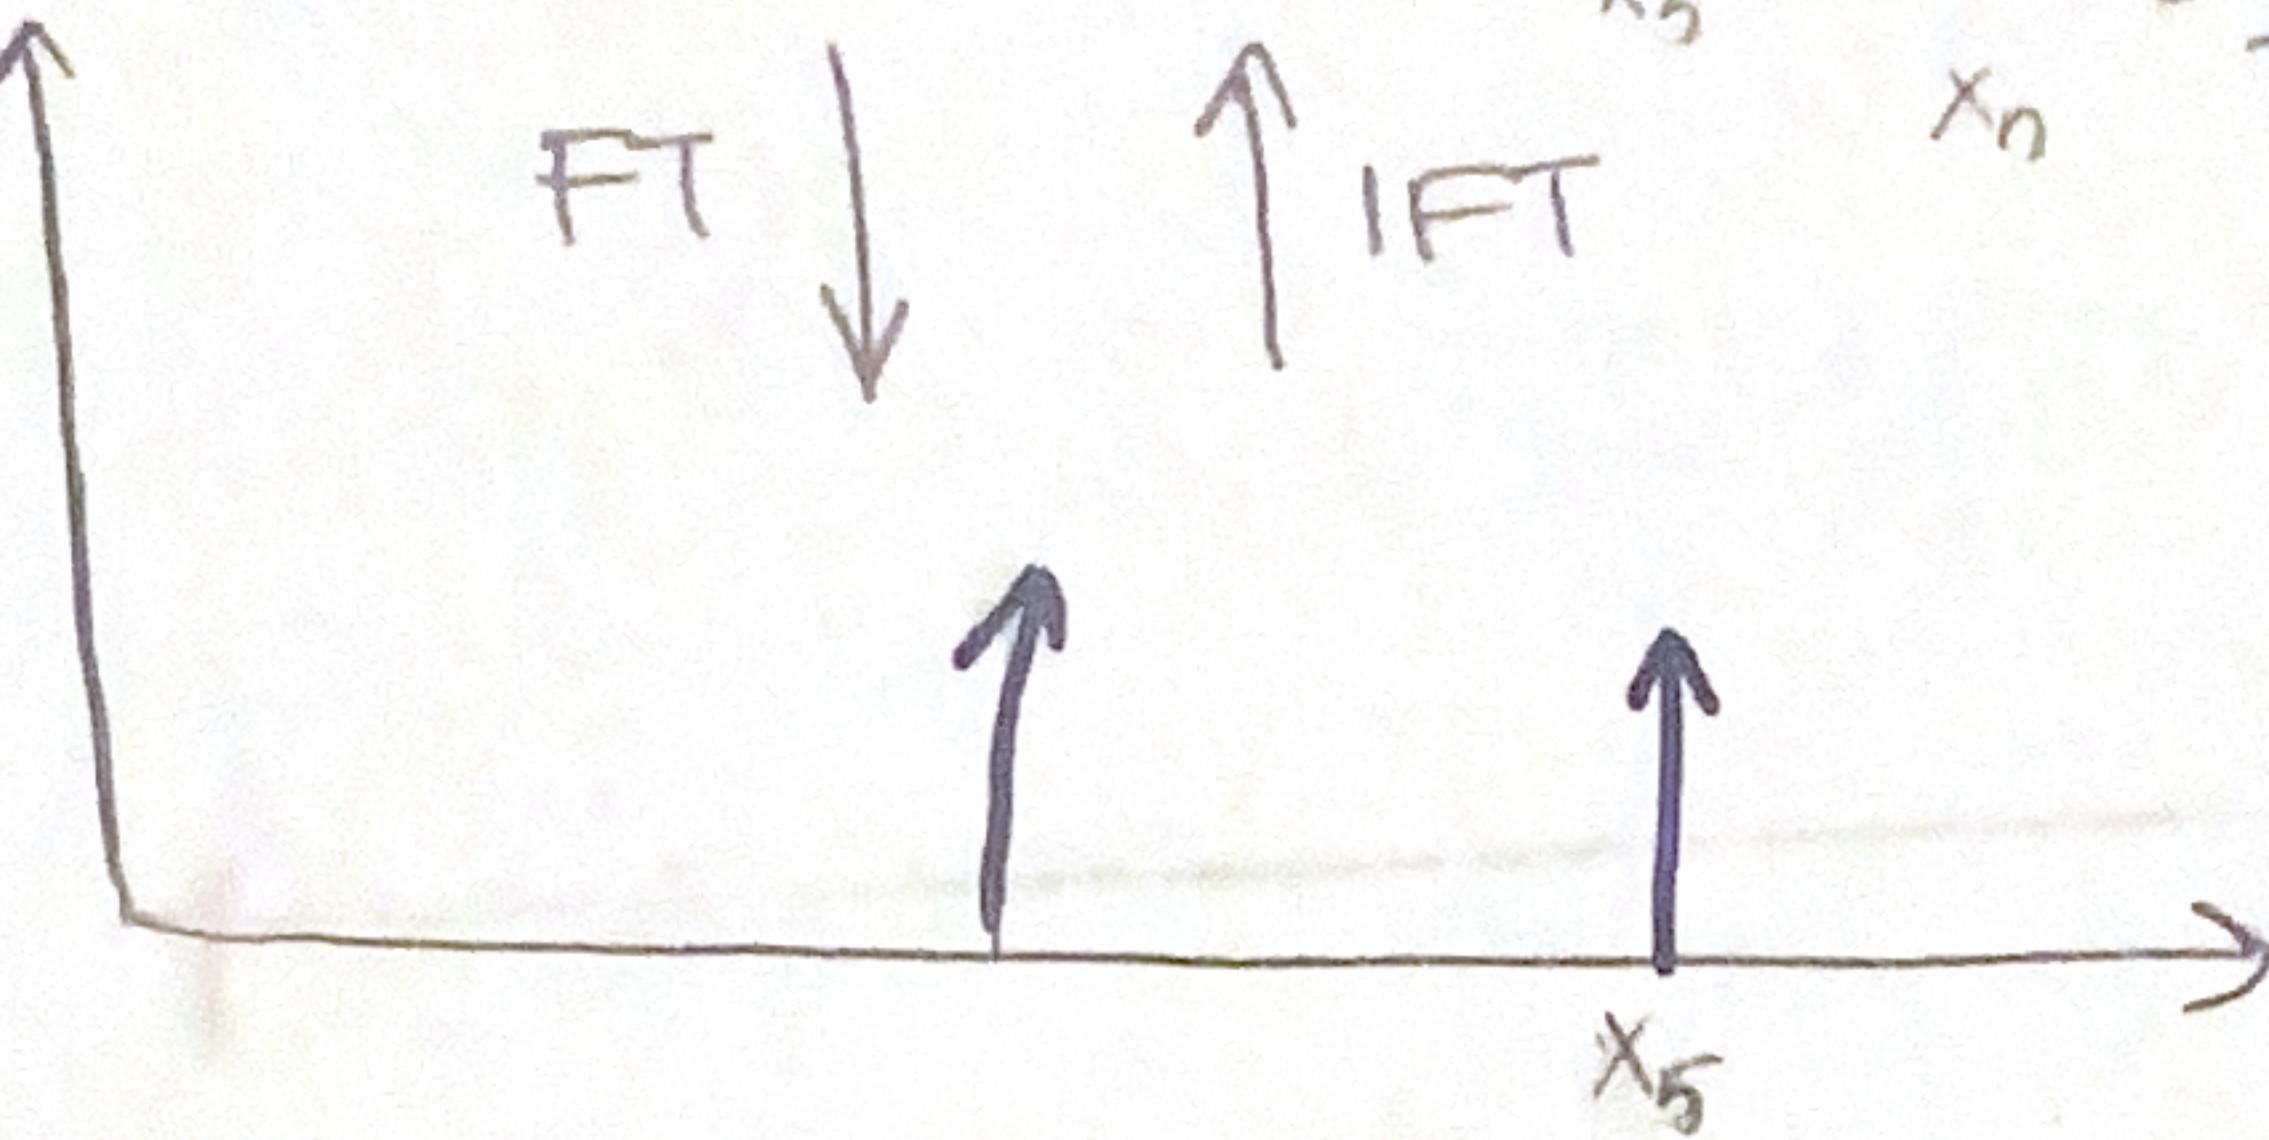

$x_n : x_0, x_1, \dots, x_{N-1}$

$[x_0 | x_1] \dots [x_{N-1}]$

↓ find coordinates

Amplitude

• Euler formula

$$\rightarrow e^{-ik} = \cos k - i \sin k$$

Based on this we calculate bins.

$e^{-i2\pi kn/N}$ } our sinusoidal coordinates
bins } (frequencies)

Frequency

x_5

I have to check similarity of every coordinate (for different k 's) with my signal.

$$FT \text{ for one bin only} \rightarrow X_k = \sum_{n=0}^{N-1} x_n e^{-2\pi k n / N}$$

We need 2 for loops to calculate all k 's

* def myDFT(x=n):

 N = len(x_n)

 for k=0:N-1

 x_k = 0

 for n=0:N-1

 x_k = x_k + x_n [n+1] * exp(-2 * pi * n * k / N)

 output[k+1] = x_k

We'll calculate this for:

	$n=0$	$n=1$	$n=2$	$n=3$
$k=0$	00	01	02	03
$k=1$	10	11	12	13
$k=2$	20	21	22	23
$k=3$	30	31	32	33
